

SUMMARY

Front-End Developer with 1.5+ years of experience building scalable, high-performance web applications using React.js, Next.js, and TypeScript. Experienced in developing production-ready solutions across LMS platforms, multi-tenant applications, payment integrations, and government-related systems. Strong expertise in responsive UI development, state management with Redux Toolkit, REST API integration, and performance optimization. Focused on clean, maintainable, and scalable code.

EDUCATION

Bachelor’s Degree in Computer Science — Excellent2021-2025

Faculty of Computers and Artificial Intelligence, Sadat City University

PROFESSIONAL EXPERIENCE

Front-End Developer at Egyptian Armed Forces (Military Service)03/2026 – present

Worked as a Front-End Developer during military service, developing and deploying multiple web applications currently used within the Egyptian Air Force, contributed to internal digital services by developing responsive user interfaces and improving overall usability and user experience.

Software Engineer at King Fahd National Library – Riyadh, Saudi Arabia2024-2025

Responsible for developing and maintaining interactive book display applications for the library.

- Created 5 applications to showcase 5 historical books with high performance and responsive design.
- Optimized book interactions and navigation to ensure smooth and responsive performance.
- Integrated Flutter applications with front-end interfaces, ensuring seamless data flow and a consistent user experience.

Freelance Front-End Developerpresent

Trend – Social Media Platform (Freelance Project)

- Developed a social media application.
- Designed and implemented interactive UI/UX for an engaging user experience.
- Integrated RESTful APIs to manage user data and real-time content updates.
- Enhanced app responsiveness and optimized performance for a seamless experience.

Interactive Chess Game (Freelance Project)

- Developed and implemented an interactive chess game with optimized performance across multiple platforms.
- Collaborated with designers to create an intuitive and visually appealing interface.
- Integrated AI for a challenging and dynamic player experience.
- Ensured smooth animations and responsive gameplay using Flutter’s rendering engine.

PROJECTS

Nova-Mart — E-Commerce Platform

 GitHub  Link

Next.js · React · TypeScript · Redux Toolkit · RTK Query · next-intl · Tailwind CSS

- Built a responsive multilingual e-commerce platform using Next.js App Router, supporting English and Arabic with full RTL localization using next-intl.
- Implemented Redux Toolkit and RTK Query for state management and API integration, with features including product search, filtering, cart, Wishlist, checkout, authentication, and order management.

Flipbooks — Interactive Digital Presentation

 GitHub

- Built a responsive RTL flipbook application using HTML5, CSS3, JavaScript, jQuery, and Turn.js.
- Implemented touch/swipe gestures, keyboard navigation, click controls, and page-flip animations for an interactive user experience.
- Integrated Fullscreen video content and optimized the experience for Arabic and mobile users.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS.

State & Data: Redux Toolkit, RTK Query, REST APIs, Axios.

Forms & Localization: React Hook Form, Zod, next-intl, RTL.

Backend: .NET, C#, Entity Framework Core (EF Core), SQL Server.

Tools: Git, GitHub, Docker, Framer Motion.

Languages

- Arabic (Native)
- English (Professional Working Proficiency)
